DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (Figure 5) in view of Trout et al. (US 6,485,321).

Applicant's APA substantially disclose the claimed invention except for an operation portion extending from the operation arm of the load lever and is providing a distance from a circuit board that is greater than a distance from the operation arm to the circuit board.

Trout et al. teach an operation portion (30) extending from a operation arm and providing a distance from a circuit board that is greater than a distance from the operation arm to the circuit board (see Figure 2).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an operation portion extending from the operation arm of the Applicant's APA load lever, as taught by Trout et al. for ease of grapping the load lever.

In the modified handle of Applicant's APA, Trout et al. do not disclose a U-shaped operation portion.

It would have been obvious matter of design choice to change Trout's operation portion to a U-shaped operation portion, since such a modification would have involved a mere change

Art Unit: 2833

in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Truc T. T. Nguyen whose telephone number is 571-272-2011. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on 571-272-2800 extension 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
